Experiência

Originate

Full-stack Developer
outubro de 2024 - Present (9 meses)
California, United States

In this role, I worked as a senior full-stack developer across multiple projects, utilizing React/Next.js for web development and TypeScript throughout. I have substantial experience integrating AI technologies, including OpenAI ChatGPT, Gemi, and other AI agents, to build intelligent, scalable solutions. Additionally, I leveraged Redis and LangChain to optimize system performance and enhance overall functionality.

Skills: Git · React · Next.js · TypeScript · Redis · LangChain · OpenAI · ChatGPT · Gemi · AI Agent Integration

Basis

Full Stack Developer
agosto de 2024 - Present (11 meses)
Rio de Janeiro, Brazil

As a Full Stack Software Engineer at Basis, I contribute to building cutting-edge software solutions that empower companies to shape their futures. My role involves working on both front-end and back-end technologies, including VueJS and Nuxt, Node.js, and various databases, to deliver scalable and high-performance applications. Collaborating closely with cross-functional teams, I ensure our clients receive exceptional solutions tailored to their specific needs.

Sierra Studio

Full-stack Developer

novembro de 2023 - junho de 2024 (8 meses)

Rio de Janeiro, Brazil

Currently working as a senior full-stack developer on various projects, using React/Next.js for web development and React Native for mobile, with Tamagui as a unified mobile + web library, all with TypeScript. I have significant experience integrating AI solutions, such as OpenAI ChatGPT, Gemi, and other AI agents, to create intelligent and dynamic experiences across platforms. My expertise also includes utilizing MongoDB, Redis, and LangChain to develop and optimize scalable solutions.

Skills: Git · React Native · Tamagui · Next.js · TypeScript · MongoDB · Redis · LangChain · OpenAI · ChatGPT · Gemi · AI Agent Integration

Robbyson

Full Stack Engineer

setembro de 2023 - novembro de 2023 (3 meses)

Brazil

Creating responsive frontend, improving UX and UI for the end user in React applications.

Skills: Web Development · GitLab · CI/CD · Object-Oriented Programming (OOP) · Microservices · Code Review · Functional Specifications · React Hooks · REST APIs · React.js · Node.js · MongoDB · GraphQL · Apollo client · Storybook · Microfrontends · Redux · ESLint · JS ES6 · Gitlab · Angular 14

Kanon Gaming Limited

Full Stack Developer

agosto de 2022 - agosto de 2023 (1 ano 1 mês)

Malta

Working as a fullstack senior developer in IGaming company, using nextJs on the frontend and nodeJS on the backend, everything with typescript. Working in a team with two junior developers, I schedule two hour per week with each of them, so we can do some pair programming, and follow the gitflow with PR approval. As a developer I'm focused on bringing new features on the frontend and improving the user experience, like connecting with the main Swedish Government's application, so the user can login using the unique personal number. And on the back I'm responsible to deal with all the external providers and third partners, including all the game provides and all the baking and payment process.

ReactJs, NextJs, Typescript, Redux, Eslint, JS ES6, Gitlab, Webflux, Angular

14

NodeJS

UX/UI Platforms: Figma, AdobeXD

GCP

Main language: English

Fetchly Labs

Full Stack Software Engineer

março de 2021 - agosto de 2022 (1 ano 6 meses)

Helping mid-sized american businesses leverage their potential with transformative technologies.

Working as a fullstack senior developer for different projects, using React on web and React Native on mobile and Ruby on Rails on the backend, everything with typescript. I worked in three different projects, One was a chat app, focused on privacy. So we create some features to control permissions and clean messages after a certain amount of time. Another project was a pattern of National Geographic, so we used VR/AR to bring some new adventure opportunities to elderly people during the lockdown.

Currently working with React, Angular, React Native, Ruby on Rails and Detox(E2E testing).

- React Native
- Redux
- Ruby on Rails
- Detox
- TDD
- Tailwind CSS
- GraphQL
- Apollo client
- Storybook
- Eslint
- JS ES6
- Gitlab

Pixelwolf

Front end Developer

outubro de 2020 - março de 2021 (6 meses)

Brazil

Working as a Frontend developer for different projects, using React, NextJS, VueJS, everything with typescript and using GraphQL to connect with the backend. I worked in two different projects in that company, first was a rent apartment project, apto.vc, we built this app using nextJS so the client would have a quick response to check the pages because of the Server-side rendering. Another project was jovemnerd.com.br, one of the biggest portals of geek and nerd culture in Brazil and one of the most listened to podcasts in the world!

Technologies used, ReactJs, NextJs, Typescript, Angular, Tailwind css, graphQL, apollo client, storybook, microfrontends, redux, eslint, JS ES6

BRQ Digital Solutions

Junior FullStack Developer

agosto de 2020 - outubro de 2020 (3 meses)

Rio de Janeiro, Brasil

Working as a Fullstack developer, focused on React and python, I work on different projects. I was using Python to create a lot of endpoints with flask and consuming some third party endpoints. Working on a banking client I was dealing with multiple transactions simultaneously, so using python and aws, we created good and stable connections with some microservices.

Fullstack developer responsible for developing applications using C # .NET | MVC WebApi | .NET Core (REST and SOAP), SQLServer, React JS, Angular | Software solutions for banks and the financial market.

Stone

System Developer

novembro de 2019 - agosto de 2020 (10 meses)

Rio de Janeiro Area, Brazil

Working as a Fullstack developer, focused on Angular 13, React and python, I was based on the logict team inside this payment company. I was using Python to create a lot of endpoints with flask and consuming some third party endpoints. I developed an online map where the security team would be able to track some of our projects. create some small scripts that speeded up the operational work in more than 35% and became more dynamic.

Fullstack developer responsible for developing web applications using technologies with Python, Postgresql, React, C #, Tailwind css, among others. ETL experience using python API with PostgreSQL to extract SQL server data.

NeoSyx Desenvolvimento

2 anos 2 meses
